We are Unique IT Institute in Srilanka

Sri Lanka, being a third world developing country, opened doors for the IT literacy, contributing its best improving to 40 % which welcomed the institutes as ours, who contributed beyond literacy. The courses IJSE offers are practical and result oriented in the international and local industry. There is no exaggeration to say that many companies waiting our students completion of the courses to offer recruitments.

According to the statistics (FITIS), the industry job market continually remains around 5000 jobs vacant but many graduates are not hired as they have failed to satisfy the industrial requirements without having proper technological skills. IJSE'S unique as it has addressed that failure and has been addressing that industrial requirements of proper technological skills. It is this uniqueness makes many walk in students recommended by impressed and successful past students. Without a doubt IJSE is the best to make the student's dream come true whoever willing to build up a successful career in software industry. We are also uniquely distinguished as the only Oracle authorized training center in Sri Lanka.

“

"You never walk out of our roof without knowing
A to Z of what you came for"

In last 10 years had produced 4300 software engineers to the nation....!

IJSE was started on the 10th January of 2006 in Panadura, opening doors for the younger generation to materialize their dream of becoming a software engineering / quality assurance Engineer through providing recognized qualifications in IT and Software Engineering. At the start IJSE marched forward with a highly dedicated team of ten individuals whose hard work resulted in opening the second branch in Galle. Within this short period of time, IJSE has achieved a leading position among the providers of Software Engineering degrees in Sri Lanka.

The uniqueness of realizing the demanded programmers and IJSE's infinite flexibilities to explore new ways and best products could mark the journey a fast moving result oriented one. This achievement in short has made our degree in software engineering highly desired and sought after out of all other IT and Computer Science degrees in Sri Lanka. The Committed individuals of our team and student centered values have brought IJSE from 30 to 700 students following our various courses in IT and Software Engineering. Our records have indicated that we had produced more than 4300 valuable software engineering professionals to the nation, and as a Sri Lankan IT education Institute we are proud to say that, many students of our first batch were recruited by most prestigious software companies in Sri Lanka placing us above all other IT course providers from the very beginning of our journey as an institute for higher education in software engineering and IT/Computer Science.

Objectives:

In the first semester of GDSE, students cover 26 of total credits. After completing the first level of GDSE program, IJSE guarantees that all students are able to analyze, design and implement a standalone software/ desktop application solution for any businesses within a short period of time to the industrial standards. They are also, able to gain sound knowledge of system analysis and design through fully practical oriented training methodologies.

Students do not need to worry on the software development phase at IJSE because, more than 4 instructors / demonstrators are assigned to handle the students' software development issues and individually monitor the progress of each student by modern lecturing methodologies.

Subjects & Modules

1	Programming Design and Programming Fundamentals
2	Business Processes and Analyzing
3	Modern UI design & Human Interaction
4	Information System
5	Database Programming
6	Object Oriented Programming I
7	Database Management System I
8	Professional Project in IT – Individual Project

Maduka Jayawardana
Tech Lead / Senior Software Engineer
BSc(Physical) University of Ruhuna

"I knew that it is so difficult to get a job for physical science degree before entering the campus. I could complete software engineering programs at IJSE. The interesting thing was, as soon as the degree was over, I got a job as a software engineer and I highly recommend IJSE if you want to follow software engineering programs.

Objectives:

To enter into the IT industry, all students are required to successfully complete the 2nd semester of GDSE degree program as it is the heart of the software engineering Principle. Enhancing the advanced knowledge of software development and designed patterns are the main aspects of 2nd semester. This module is very unique and designed comprehensively to uplift the knowledge of students to develop high end software solutions to maximize the performance and efficiency that are enabling the layered architectural designs.

After completing the 2nd semester of GDSE degree program, all students are able to analyze, design and implement entire software solution using client server and distributed functionalities. Student cover 26 of total credits.

Subjects & Modules	
1	Network Programming
2	Design Patterns
3	Object Oriented Programming II
4	Database Management System II
5	Professional Project in IT (Client Server Application) – Individual

Nimesh Perera
MI-Synergy (pvt) Ltd.
Associate Software Engineer

"I was passionate about learning JAVA, not just doing an overall study but was seeking something which will be unique, where I can specialize in that area mainly. First it seems like an impossible task to find until I go to know about, IJSE. Choosing to study there was one of the best decisions that I have ever made. The speciality of IJSE is that it gives marvelous opportunities such as just by completing CMJD and ABSD within just one an half years of time, I'm eligible and qualified to go to this technological wide industry. This is the most vital part, where the state universities or any other private universities don't open the gate for such an opportunity within a short period of time. CMJD and ABSD gave me a wide knowledge of JAVA and software engineering, it's theories and how it applies to the industry as a whole. I started with CMJD and by the time I was done with ABSD I could start working in MI-Synergy(Pvt) Ltd, in the field I was studying, as an associate software engineer. I successfully completed the BCS diploma at IJSE which gave me all the knowledge, foundation and the training for my BCS professional graduate diploma, which I'm currently studying at IJSE. My stay there is very rewarding and it is satisfying to see majority of my batch mates being employed as soon as they completed ABSD at IJSE".

Objectives:

In the 3rd level of GDSE degree program, students have two options to choose Quality Assurance Engineering and Software Engineering. After completing 3rd semester, all students are able to comprehensively analyze, design and implement a web solutions for any type of business. Most probably students need to fulfill the requirement of e-commerce application and social media network solutions. 30 credits are allocated for the 3rd level of GDSE degree program and two optional modules are also assigned.

Subjects & Modules	
1	UI designing and Front End Technologies
2	Search Engine Optimization
3	Server Side Programming
4	Automated Testing
5	Design Patterns in Server Side Application I
6	Professional Project in IT (Web Base Application)
7	Agile Software Development
8	Quality Assurance Engineering
9	Test Driven Development (TDD)
10	Estimation
11	User Experience

Ama Sakunika
Web developer - Ebeyonds
Southlands College Galle

Just finished my A/L's I had dream to enter IT field. But I had no idea about the position or any path. At that time I went to a seminar held by IJSE & no acquaintance about what is software engineers do. After participating the seminars that held my various institutes I decided, IJSE is the correct and best path to achieve my goals. Therefore I joining hands with IJSE & it became my second home. Specially I would like to recommend excellent lectures and lecture panel that guide me like my parents & they always be there to show the correct way to me. IJSE not only given us a limited knowledge, but covered every skills which should have in a Software engineer. As a result of all these things currently I'm working at Ebeyonds Digital Marketing company as a web developer since 1 year because I'm interested in web developing side. Specially, ABSD course that conducted by IJSE helped me to start my career in this side. Therefore I need to give all regards regarding this to IJSE & my parents. Still IJSE is with me when I need any advice or any help for my Higher Educations or my career life & I recommend IJSE, as the best institute for anyone who wanted to achieve their goals in IT side.

Objectives:

48 credits has been allocated for the 4th level of GDSE degree program. Server side application, web services and mobile application development are the main areas covered. The GDSE program has been designed to cover the entire business world. Therefore all students are able to develop A – Z solutions using any modern technology and concept. Finally 130 credits are covered by the student at the end of the degree program.

Subjects & Modules	
1	Design Patterns in Server Side Application II
2	Object Relational Mapping
3	Frameworks in Server Side Application
4	Web Security
5	REST Base Web Services
6	SOAP Base Web Services
7	Mobile Application Development (Android)
8	Professional Project in IT (Distributed Application)- Individual Project
9	B2B Integration with ESB
10	S2S Communication
11	Clustering and Data Warehouse
12	Advanced Concepts of Development
13	Cloud Base Software Development

Kasun Nalinda

Associate Software Engineer
Reservation Gateway(Pvt)Ltd.
Thelijiwila Central College.

3 years ago, when I was a student too, I was reading a letter wrote by a former student of IJSE who became a software architect and was wondering if I could become one of them too. I was pretty much interested in the IT field and computer-related jobs since my childhood but had no plans in how to reach out to my dream. After my A/L examination I wanted to follow an IT course to back me up for my future career. So I joined IJSE and it was not after much time I realized that this is not just another IT course. And in the end it did not only aided me for my career but it completely built up me as a Software Engineer! Today, not after a long time I finished my CMJD & ABSD course, I am quite glad to say that I am pretty stable with a reputed position in a reputed IT company. A/L exam was not the turning point of my life but IJSE is. It's always possible for anyone out there with the true determination and commitment, specially when IJSE is behind you to give you the hand to climb up the ladder of IT industry. Here I am more than happy to pay my gratitude towards the #1 professional Information Technology institute in Sri Lanka, IJSE, for making my dream true in such a short period of time. My heartiest wishes are for the students of IJSE who are on their way to the success of life!"

IJSE Produces Highly Skilled Software Engineers

When we are selecting a Software Engineer to join our team the knowledge level is a major criteria.

We also look at the candidate's team work ethics, the ability to think out of the box and being able to handle wicked problems.

Historically we have seen that students passing out from IJSE have an edge in this regard and have bonded very well to the MISyn family ”

IJSE

Akila Sasanka

After finished my A/L exam.I wanted to do a different thing to success my future.I selected IT as my future pathway.So I thought to follow software engineering course.I selected IJSE as my guider.So now I think it was a best decision to success my future goals.As a result of it, Within one year I work in a leading software company in srilanka.So I think IJSE guided well me for that.This is the best place for improve knowledge and Success.

Akila Sasanka

MI-Synergy (pvt) Ltd.

Associate Software Engineer

SriLanka's #1 institute of Software Engineering

As being an student I was erect a solid vertebra for technological education which eventually aided to being an enterprise software architect as being a part of one of the world largest education company. As an institution the trait was, is and will be to inspire the technology industry via delivery of enormous capability full of individuals as it reflected over the vision. I wish all the very best in future endeavors for IJSE.

Thisara Alawala
Enterprise Software Architect - Pearson Lanka

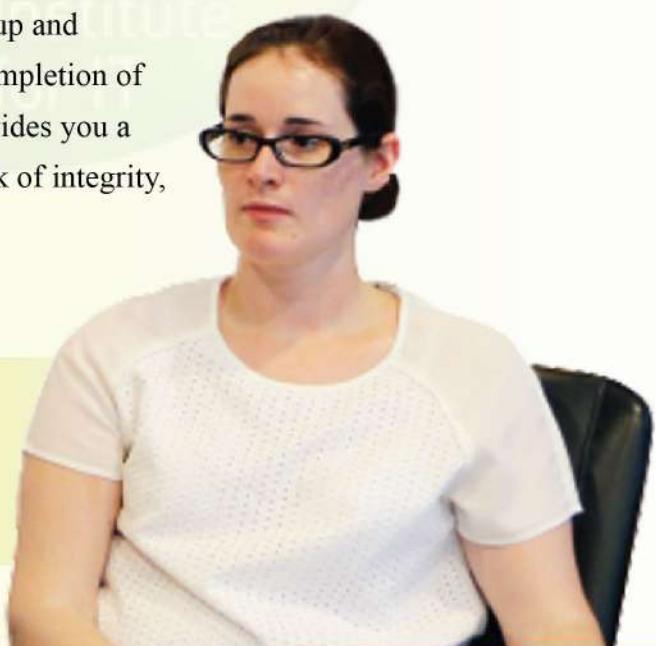

Employers are looking to develop digital IT talent with young people just like you

To step onto a pathway for a career in IT, you need to choose the right qualifications and a pathway that will give you a head start as you venture into the world of employment. Digital Technology is evolutionary, exciting and essential in all that we do – you too could be a part of this fast-moving digital industry. With advances in robotics, artificial intelligence, 3D printing and biotechnology, to name but a few, there's a global need for young digital IT talent. Higher Education Qualifications from BCS, The Chartered Institute in IT will provide you with a pathway to a successful career in technology, and employers with the digital talent they want now and in the future. BCS, The Chartered Institute for IT is working closely with government, educators and industry to encourage more young people to become the next generation of global leaders in digital innovation, this could be you !

IJSE is a local Sri Lankan BCS approved centre committed to working with us in the delivery of BCS Higher Education qualifications, developing and supporting young people who have the aptitude, competence and digital talent that industry need and want. As your professional body we will provide you with support during your studies and throughout your professional career. Get involved with BCS Sri Lanka, networking with some of the industry's finest minds and represent the next up and coming digital IT generation as a BCS student member. Completion of all levels of the BCS Higher Education Qualifications provides you a pathway towards Chartered status, the IT global benchmark of integrity, quality and professionalism.

Student Feedback

Since my little times I wanted to be not anyone else but a software engineer one-day. And I like to explore new things about the latest technology. After A/Ls I didn't have any idea of what I'm gonna do next, So I searched a good path for my determination. I searched for many course programs but none of them matched for my favour. Once I got to know about IJSE. I started the CMJD & got to know very easily about software development because of their own techniques of teaching. The magical teaching at IJSE helped me to learn about java from A to Z. After finishing I started my own software firm because they fed me with the knowledge which is to be needed by any of the good software developer in the industry. I decided to do the ABSD finishing that I got a clear idea about the industry that I we have to deal with. IJSE is the main reason for what I am today! Because of the recognition and what I learned from IJSE, I have got a scholarship from IIT as well.

Today I have achieved my target, my dream because of the decision that I have taken to go to the IJSE before two years! I think that day, I have made the turning point of my life and I would like to introduce IJSE as the main milestone of it! Happy to say that IJSE helps me a lot for my career path. Today I work as a associate software engineer at SP Solutions. I express my heartfelt thanks to IJSE & this is the best place to become a Software Engineer.

Stelan Briyan Simonsz
Associate Software Engineer
SP-Solutions (PVT) LTD

Dedicated Training Program (DTP) for undergraduates

As scheduled, IJSE offers two DTP per year for the university students (undergraduates) who need to fill the gap in their knowledge and skills in the software engineering field. To initiate the DTP session, a request should be sent by the university, after the request received, the students of selected university must participate in the interview sessions conducted by IJSE academic panel. Finally shortlisted students can participate for the DTP as the schedule given by the university, typically the length of internship of state universities will be 3 or 6 months. However, through this free of charge program, IJSE offers a valuable service to the nation as a leading software engineering institute in Sri Lanka to fulfill the requirements of IT industries and giving more opportunity for the younger generation who are seeking jobs in the IT field by filling the gaps of individuals.

Because of the unique content and training strength of the DTP, undergraduates, studying in the fields of engineering, computer science or IT were able to contest with the IT industry demands positively, therefore, the demand for the DTP is also rapidly increasing day by day and the spaces in the IJSE premises are not enough to threat undergraduates in Sri Lanka. And also, due to the advancement of the technology and concepts in the IT sector, after the graduation, students are found more difficulties when entering to the IT industry, especially for software developing even though at least 30-40 academic subjects have been completed. About last DTP were held for the faculty of engineering, university of Ruhuna and University of Sabaragamuwa.

Successfully conducted the DTP program for the university of Ruhuna and University of Sambaragamuwa from 01/03/2017 to 31/06/2017 at IJSE panadura branch while, Mr.Namal Yasanga, Associate Architect was assigned to evaluate the quality of the training, and, Mr.Ranjith Suranga who is a senior developer was assigned to carry out the training sessions effectively. Throughout the DTP in 2017, all students worked hard to get trained and capture the content which IJSE delivered in the training period as the only institute in Sri Lanka to produce software engineers within a short period of time and take all responsibility to send them into IT industry.

Through this DTP, IJSE focus to filling the gap between students and the IT industries. Therefore, it is covered software designing and implementing phases to the industry standards. And also, polished all the relevant software development skills to develop e-commerce, client –server and web base applications themselves. At the end of the DTP, all undergraduates were 100% satisfied and institutes and trainers were received positive feedback from all undergraduates and they wished to share their ideas about the program with other students, therefore, many comments were written by the students.

“

Conducting School Career Guidance Programmes

2017

A country's future depend on the hands of the youth that's why

As one of the nations leading educational institution we consider its our duty help the students when ever they need help. That's why we provide the career guidance programs to help them to make the right choice for their career. Most students consider that university is the only path but we show them how to become a successful professional in other Fields. We provide the career guidance to O/L students A/L students.
